

Ph. D. Student Initiative Programme

The 2017 International Microwave and RF Conference (IMaRC 2017) includes the 'Ph.D. Student Initiative Program' under the sponsorship of the Education Committee of the IEEE MTT-S. Under this initiative, doctoral students will be invited from different Universities to attend the conference, get exposed to state of the art research work and hence contribute to enhancing the quality of RF/Microwave research. Their travel and accommodation will be supported (at actuals upto a ceiling). Of course, this does not apply to students who plan to present paper at IMaRC 2017. The Ph. D. students should be recommended by their respective guide/supervisor. Only limited students from all over India will be sponsored. For details you may please contact
